

ET Series

Hheavy duty construction distinguishes the ET Series large capacity lathes. Designed for applications where high rigidity is required, these machines can be custom configured for your most demanding applications. Easy to use operator interface allows simple shop floor programming for one-off parts. High performance drives and motors combines with standard G-Code interface allowing production to run smoothly and efficiently.

Construction Features

- Rugged certified FC-30 Meehanite castings.
- Hardened and ground way surfaces with Turcite B.
- Precision ground double nut ballscrews.
- 30HP four speed high torque geared headstock.
- Massive tailstock with #6 taper.
- D1-11 spindle with 4.10 through hole.
- Heavy duty Z motor provides 10,000 lbs. of thrust.

Custom Configured To Your Application

- Available with 60", 80", or 120" center distance.
- Heavy duty 8 station automatic turret.
- 'C' Axis with live tooling.
- 4" or 6" through hole.
- Automatic chip conveyor.
- Powerful hydraulic chucks with 12"-20" capacities.
- Network interface option.
