

MB-Q Series

The Fryer MB-Q Series is the ultimate mill for your toolroom applications. Built to be the most accurate and reliable machine of its type, it is also extremely easy to use. Equipped with a manual quill and manual handwheels, the "Q" Series gives you the flexibility to use in manual, semi-CNC or full-CNC modes. The conversational control makes programming easy so even one off parts can be done quickly and efficiently.

Manual Operation

- Manual handles for X and Y axis.
- Digital readout for positioning.
- Manual quill with optional glass scale.
- Simple teach mode records manual moves for automatic machining of additional parts.

Semi-CNC Operation

- Power feed function.
- Simple "GoTo" function for axis positioning.
- "Do One" function allows you to easily cut pockets, chamfers, radius, boring and more.

	MB-11	MB-14	MB-15	MB-16
X Travel	30"	40"	50"	60"
Y Travel	20"	20"	25"	25"
Z Travel	21"	21"	24"	24"

Full CNC Operation

- Simple menu system—no codes of any kind.
- Reads standard G & M codes from CAD-CAM systems.
- Switches between 2 axis or 3 axis modes easily.
- High speed machining function for mold makers.
- Automatic drilling and pocketing cycles.
- Reads DXF file from AutoCAD™.
- 3D part verification.
