

## SL Series—Slant Bed Lathes—True 45 Degree Slant for Greater Rigidity

The Fryer SL Series of slant bed lathes feature a true 45° slant bed for greater rigidity and more accuracy. High accuracy combined with high performance cutting capabilities gives the SL a strong advantage above its competitors. Ease of use and fast set-up means efficient shop floor programming for both short run and production jobs.

### More Standard Features Than Any Other Builder

- True 45 degree one piece slant bed.
- 12 station automatic turret.
- 1,200 IPM rapid traverse.
- Double nut ballscrews.
- Digital spindle and axis drives.
- Absolute encoders—no homing needed.
- HRV 3-high precision servo control.
- Tool management and fixture offsets.

### Custom Configured To Your Application

- Multiple chuck options.
- 12 station, 8 station or live tool turrets.
- Large bore spindle.
- Chip conveyor and washdown system with high pressure coolant.
- Automatic tool setter.
- Barfeed systems.
- 'C' axis spindle.

	SL-6	SL-8	SL-10
